

Webinar Report

India's Challenges at LAC and Possible resolutions moving Forward on 11th July, 2020

Expansionary trend of China threatens, global forces unite: Indresh Kumar

A countrywide webinar was organized by FANS (Forum for Awareness of National Security) on the challenges before India regarding the Line of Actual Control (LAC) and the expansionary policy of China. During introduction of topic of webinar, Rastriya sangathan mantri of FANS said that India stressed the need to reject a China policy.

Addressing this webinar, National Guardian of Fans and All India Executive Board member of Rashtriya Swayamsevak Sangh Honorable Shri Indresh Kumar said that China's expansionist policy is no longer hidden from anyone. Most countries of the world are now aware of this intention of China. The manner in which China has expanded its expansionary agenda in the last few decades in the Asia region and the repressive policy and economic temptation it has woven for it has now been exposed to the whole world. It is now quite clear that China's expansionary policy is dangerous to the world. Continuously encroaching on the borders of neighboring countries and causing unrest in the world reflects China's expansionist, demonic and dictatorial character. He said that if we do not take appropriate measures against it from now onwards, then the expansion of China will be a shock not only for the Himalayan regions and India, but for the whole world. It may be that some Asian countries like India will face many challenges in the coming years, but measures and remedies should be taken to deal with it in time.

He said that India today made a strong strategy in Ladakh, Lahaul Spiti, although China opposed it. The government of India's diplomacy has shaken China during and before the skirmishes between the two countries in the Galvan Valley. China should stay on the LAC. In these conditions, the people of India should be vigilant and strongly oppose China. Today, India has taught a strong lesson to the Chinese Army, so the world is also with India today. Global unity is essential against the challenges being presented towards China. It should not change in the horrors of war, so it is necessary to rein in every action of China.

Indresh Kumar also said that the world needs to be aware of China's tendency to enslave. Tibet was never a territory of China, but problems have arisen due to its oppressive policies. Because of China's imperialist and expansionist policy, Tibet remained a slave. We must now take more serious initiatives for the autonomy and independence of Tibet. He said that China constantly adopts imperialist policies and pressures its neighboring countries and occupies their lands. China has engaged its forces, political and diplomatic resources in this expansionist game. He has been putting similar pressure on India for the last several years. But now, with a strong government at the center (Modi government), there has been a very positive change in the strategic situation. The Modi government has now changed the policies of the previous governments, so China has also been shocked.

He said that today's India is giving a strong message to China along with teaching Pakistan a lesson. Apart from Ladakh, India also has a border dispute with China in Arunachal Pradesh, Sikkim. When India is struggling to monitor its borders, the wretchedness of China has started to face a tough challenge. He said that China has been named the dragon because China's hands are always soaked with blood and it is an old habit to bleed innocent people. China has never believed in the human life system.

He also said that the independence of Tibet is necessary for the unity and integrity of India. If this happens, the country's borders will be completely secure. Today the whole world is aware of China's expansionist policies. The public awareness about Tibet's independence is now gaining momentum. The independence of Tibet will bring many benefits to India. The first advantage will be that peace will be established on the border. Along with this, freedom is also very important in Taiwan, Hong Kong. In present times, the turbulent conditions there are due to China. Today, Nepal, Tibet free of Chinese expansion is needed. It should be made a mass movement. The Hong Kong movement also needs to be supported. If the forces of the world remain silent on the Hong Kong incident, this crisis will increase.

China's aggression is also increasing in the South China Sea. Here, China is forcibly infiltrating Vietnam's maritime border. Due to this expansionism and imperialism, he is fighting with countries like Japan, Vietnam, America and is challenging the world. It is very important to rein in China's antics in the South China Sea. He also said that South China Sea should be named East Sea or Malay Sea. The South China Sea should be free from Chinese occupation.

Diplomatic, political, spiritual powers must be fully careful to thwart China's devious plans in the region. It has been China's old policy to expand its territory by grabbing the land of others. This is why China has a border dispute with almost all its neighbors. Not only this, China is also in conflict with Japan, Russia and Vietnam on the border.

He said that China used bio-weaponry in the 21st century and whose punishment is being suffered by the whole world today. The whole world is crying, millions of people got infected and millions died. Without using any explosives, China took the whole world under target. This is a well-planned and deep plot of China. Describing the corona virus as China's birth, he said that China has put the whole world in the well of death and it is the biggest enemy of humanity. He said that this global epidemic has been developed by China as a biological weapon to nurture man-made and its expansionary policy. He told that due to a skilled and strong leadership in India, India was successful in securing itself from this epidemic. India is playing a leading role in defeating Corona. This global pandemic has also exposed China's inhospitable face to the world stage. Today China has installed the system of making bio-weapons in its lab. Now the world will have to come up with a new strategy against it.

China's attempt to occupy Taiwan and Hong Kong, capture Pakistan's witness sea port in the name of development, stop Pakistani rulers by giving money, Nepal's governing Communist Party greed for money and security to Nepal Mortgage is an example of China's expansionary policy and dictatorial thinking. It is the duty of India, Asia and the whole world to stop the cruelty of China.

Indresh Kumar said that China was far away from Himalayas earlier but today he has come and sat there. His expansionary policies also threaten the independence of Nepal, Bhutan and the integrity of India. He said that people in Nepal and Bhutan are also raising their voice against China. Commenting on China's activities, Indresh Kumar said that China is engaged in encircling India by buying or influencing our neighbors like Nepal, Myanmar, Sri Lanka, Pakistan, but China's move will not succeed. China has also seized Nepal's land by betraying it. China has created opposition to India in Nepal, this is its well thought out move. There is an attempt to tie Nepal into slavery. China's expansionary policies are now being understood by the common people of Nepal. China's expansionary policies will swallow Pakistan one day as well. He also used Pakistan to oppose India. Except for Bhutan, all the neighboring countries of India

including Maldives, Sri Lanka have been caught by China, but now they are facing stiff resistance in these places. He resorted to military power and diplomacy to set his plans and set an economic trap.

China has so far adopted an inhuman and violent attitude towards India, Asia and the world. China is following expansionary, imperialist and violent policies. To bring China on the right path, it is necessary to break the back of its economic empire. China's economic boycott on the global stage is critical. Today it has become extremely important that India become a leader in products on its own and take tough steps to become self-reliant.

He said that to bring peace in India, Asia and the world it is necessary to stop the expansionist policy of China. Global forces have to unite to fight this protectionism. The solution of the global problem will come out of the civilization of the East. Today the whole world is looking at India with hope. India has always been a champion of world peace. Humanity should not be bound into slavery, its independence of geography should be maintained, so the whole world is looking towards India. Today there is a need to awaken, to unite, to sacrifice and to sacrifice. Today's program will give Janakranti a great strength.

Right there, while addressing the webinar. H. RN Singh said that now the relationship with China is not going to improve in the near future. India will have to be strong in every way to better fight China on every front. India will have to increase its defense budget. Underlining the importance of Tibet's independence, he said that India must now move seriously on this issue. National General Secretary of Fans Golok Bihari Rai said that we have to reduce our dependence on China. Therefore, it is important to liberalize the policies for setting up industries in India. Small industries should be encouraged so that we can make more and more things we need. Policies will have to be made to promote various construction sectors. The conflict between the two countries increased after clashes with Chinese troops along the Line of Actual Control in the Galvan Valley of Ladakh. The demand for the boycott of Chinese goods is now growing in India.

The webinar was also addressed by military officials, academics and many other national speakers. Many well-known personalities of the country participated in this webinar.
